Veeam Reporter -- Storage Capacity
www.veeam.com

Use this report to identify virtual machines which are taking the most of you storage space and/or running in the snapshot mode. Consider reducing storage space consumption by removing unnecessary snapshots, and investigating the reasons behind high VMDK sizes of the top machines. To reduce the number of virtual machine displayed, you can filter the output to show specified data stores or cost locations.

Root (All)
 Datacenter (All)
 Cluster (All)
 Virtual Disk (All)
