000	🥪 Install Remote Desktop Connection			
	Standard Install on "Macintosh HD"			
<ul> <li>Introduction</li> <li>Read Me</li> <li>License</li> <li>Destination Select</li> <li>Installation Type</li> <li>Installation</li> <li>Summary</li> </ul>	Click Install to perform a standard installation of this software on the volume "Macintosh HD".			
	Change Install Location Go Back Install			

## Now, click Install

	Installer requires that you type your password.	
	Name: daryl	
	Password:	
Details		
?	(Cancel) OK	

You'll need to authenticate - so - type in the password you use to login your Mac

The software will start to install - see below

• Summary	Running AutoUpdate Installer script Go Back Continue		

Pay close attention – within a few seconds you should get the following pop-up on your screen

	quit_apps	
4	"Microsoft Software Installation" doesn' the «event sysodisA» message.	t understand
	Edit	ОК

You'll click OK and continue on.

BUT, here's the tricky part, sometimes (this is a bug) this particular pop-up won't show up. It's there, but "hidden" so you'll need to "drag" the front window down the screen a little bit to "unhide it"

Simply click (and hold your mouse button) in the "title" area of the "Install Remote Desktop Connection" window and drag it down a few inches to "unhide" the box above... It'll look like this

Great, you unhid it. Now, click OK. The software continues to install and finishes normally.

Okay, you have installed RDC2 for Mac. Click Close.

Now, open your Finder, and click on the "Applications" menu section on the left-hand side of the Finder Window.

In your applications, you'll see "Remote Desktop Connection" - click on that and drag it to your Dock Bar (the shortcuts at the bottom of your screen) and place it there for easy access.

You'll see mine below just to the left of my Firefox (the orange) icon.
